Objective

Driven and adaptable engineer aiming to deliver meaningful solutions through innovation, collaboration, and continuous growth.

Education

Bachelor of Computer Engineering, honours in Cybersecurity, Dec 2021–Jul 2025
Savitribai Phule Pune University, Pune, MH GPA: 9.0/10

Experience

Junior Software Engineer - Cognizant, Sep 2025 – Present

- Working for ING Bank (via Cognizant) in Core Banking, designing and delivering 100+ Spring Boot microservices on Azure using Kafka, Cassandra, and REST APIs; built scalable caching (30M+ req/day), AOP-based observability, and optimized CI/CD pipelines—enhancing system reliability, security, and cloud efficiency.

Software Engineer Intern - Cognizant, Apr 2025 – Aug 2025

- Java (Spring Boot), React.js, Full-Stack Development, RESTful APIs, Agile, Frontend-Backend Integration, CI/CD, Code Reviews, Scalable Systems.

Technical Skills

- Programming Languages:** Java, Python, C, C++
- Cloud Computing:** Azure Cloud Services, Serverless Computing, Virtual Machines, Containerization (Docker, Kubernetes, OpenShift)
- AI & Data Science:** Machine Learning, Deep Learning, Natural Language Processing (NLP), TensorFlow, OpenCV
- DevOps & CI/CD:** Git, Jenkins, Terraform, Ansible, Kubernetes, OpenShift
- Database Management:** SQL, Google Firebase, MongoDB
- Internet of Things (IoT):** Embedded Systems, ESP8266, ThingSpeak, MQTT
- Software Development:** RESTful APIs, Microservices, Agile Methodologies
- Soft Skills:** Problem Solving, Critical Thinking

Projects

QuickCart: E-commerce Software (GitHub)

- Developed a scalable e-commerce platform using Tkinter and Firebase backend.
- Implemented secure authentication using JWT and OAuth.
- Optimized API response times using caching strategies.
- Enhanced user experience with dynamic UI elements and real-time updates.

HealthPod: IoT Healthcare Monitoring (GitHub)

- Developed an IoT-based system for real-time health monitoring using ESP8266 and biometric sensors.
- Integrated cloud-based analytics using ThingSpeak and Azure AI services.
- Designed a Flutter-based mobile application for remote patient monitoring.
- Implemented MQTT for efficient data transmission between sensors and cloud.

Awards & Achievements

- 2nd Place: International ROC RoboAnalyzer Competition, IIT Delhi 2024-25.
- 1st Place: IBM Qiskit Fall Fest Quiz and Hackathon 2024-25.
- Participation: ISRO Robotics Challenge, URSC 2024.
- Participation: Smart India Hackathon (SIH) 2023.
